

DARTS AUSTRALIA Inc.

RISK MANAGEMENT PLAN

Darts Australia needs to identify, evaluate and manage risks associated with the members and that having an up to date, effective risk management process in place is crucial to this as well as an important step to establishing quality governance.

Darts Australia needs to meet its legal responsibility to take reasonable steps to reduce the likelihood of injury to its members and others involved in its activities as a result of any foreseeable risks. By implementing this plan, Darts Australia is committed to establishing a safe environment for its members and has committed to the implementation and ongoing maintenance of this plan.

Purpose

Risk is an inherent component of sport delivery and as a result, quality risk management processes seek to assist Darts Australia to identify, assess and manage potential risks before they occur.

A risk is defined as anything untoward that can affect Darts Australia by creating exposure to potential loss or damage. The purpose of the risk management plan is to create a proactive approach to the identification, analysis, assessment, control and avoidance, minimization or elimination of unacceptable risks rather than a re-active approach, hence creating a safer environment for its members.

Darts Australia recognises that effective risk management is an ongoing process and must be monitored at all times.

The Six Step Risk Management Process

STEP 1- Content

- Financial
- Brand
- Member services
- Sports competition/activities
- Social events

STEP 2 -Identify

Darts Australia encourages all members to assist the Board of Directors to identify potential risks. Each member will be involved in different areas of Darts Australia and has different skill sets, experiences, interests and roles. For example, coaches and players may be in a better position than the treasurer to identify risk associated with equipment.

Techniques to help identify risks include:

- Brainstorming
- Incident review — reviewing past events will help to generate a very real examples of the risks that remain that remain in Darts Australia's activities and functions.
- Research — Talk to people who run clubs similar to Darts Australia to find out what risks they have encountered. Look into any support resources that may exist to manage risk.
- Guidelines — Review guidelines relevant to darts, e.g. coaches' qualification, equipment standards, governance requirements, etc.
- Site visits — Inspect the equipment used, observed training sessions, games, events, etc. and make notes on possible risks.
- Scenario — Go through some different scenarios to identify how the Club is positioned to handle these, e.g. if there is a serious injury, do you have the required first aid equipment and qualifications, do you have relevant emergency contact details, etc.

STEP 3 - Analyse

Once a risk has been identified, the next step is to determine what the likelihood and the consequence of the risk is. The following tables/descriptions enable the club to

determine both the level of likelihood (A, B, C, D, E) and level of consequence (1, 2, 3, 4, 5) for each risk. These levels then enable the risk to be evaluated in step 4.

Likelihood:

Utilise the descriptor table below to provide an indication of the likelihood an identified risk may occur.

LEVEL	CATEGORY	DESCRIPTION
1	Negligible	No injuries — minor first aid (e.g. Band-Aid), short term discomfort (e.g. bruise, headache) Low financial loss
2	Minor	First aid treatment Temporary disruption or halting of part or whole of event Medium financial loss
3	Moderate	Formal medical treatment required (e.g. ambulance, hospital, doctor) Temporary delay of event requiring external assistance (e.g. police, fire, maintenance, security etc.) Medium — High financial loss
4	Major	Extensive injuries, hospitalisation. Could result in a notifiable occurrence Loss of production capability Event disrupted and requiring investigation and outside assistance (e.g. Fire, Police) Major financial loss
5	Severe	Death, permanent incapacity Event cancelled with investigation and potential prosecution e.g. fire, ambulance, Catastrophic financial loss

STEP 4 Evaluate

What is the level of the risk and is it acceptable?

The matrix below enables the club to identify the levels of risk by cross-referencing the selected level of likelihood and consequence determined in step 3.

Those risks evaluated as 'Very High' will have a significant impact on the Club and a high likelihood of occurring while those with a 'Low' rating are very unlikely to occur and have minimal consequences to the club. This rating should form a key determinant of how you treat the risk in step 5 e.g. a low rating may see the risk being accepted while a high rating may mean it is avoided completely.

Likelihood	Consequences
------------	--------------

	Negligible 1	Minor 2	Moderate 3	Major 4	Severe 5
Almost Certain	Medium	High	Very High	Very High	Very High
Likely	Medium	Medium	High	Very High	Very High
Slight	Low	Medium	High	High	Very High
D Unlikely	Low	Low	Medium	Medium	High
Rare	Low	Low	Low	Medium	Medium

STEP 5 - Treat

Risk treatment involves identifying the range of options for treating the risk, evaluating those options, preparing a risk treatment plan and implementing that plan. It is about considering the options for treatment and selecting the most appropriate method to achieve the desired outcome.

What are some ways you can manage/treat a risk? Standard treatment options include:

- Accepting the risk — for example most people would consider minor injuries from participating in the sporting activity as being an inherent/acceptable risk.
- Avoiding the risk - Cancel or changing the activity is a way to avoid a risk. For example, a rock climbing club decide to run a come n try day but have since found out their trained and accredited instructors are unavailable that day. Darts Australia may decide It is better to avoid this risk by rescheduling or cancelling the event.
- Reducing the risk — It may be possible and acceptable to reduce the likelihood or consequence (or both) of a risk through a certain action, policy, equipment etc. For example the use of mouth guards for players in some contact sports may reduce the likelihood and consequence of a risk to an acceptable level.
- Transferring the risk in full or in part, will generally occur through contracts or notices for example via the policies of the association that your team plays within — □ Darts Australia, insurance coverage, lease agreements, waivers and warning signs.
- Retaining the risk is knowing that you may not be able to eliminate the risk, but instead acknowledging the risk is an important part of the sport activity and some risk must be

retained because of the inherent nature of the sport activity. If retaining the risk it is important to consider the likelihood and consequence of the risk

Whichever option you choose to treat a risk, if the risk has rated highly you will need to carefully consider necessary policies, procedures and strategies to treat and/or manage the risk should it occur.

These will include:

- Who is responsible
- What is needed
- What is the timeframe
- How you will know when the risk has been successfully managed External advise e.g. insurer, solicitor, affiliated state body etc.

STEP 6 - Monitor and Review

Once treatment of a risk has been determined it is crucial that Darts Australia continues to monitor the risk to ensure the likelihood or consequence doesn't change and that the identified treatment is correct and effective.

The ongoing review of all possible risks to Darts Australia is also crucial to ensure the club proactively identifies any changes that may expose Darts Australia to additional risks over time. Some areas such as facilities and equipment may need monitoring and review regularly e.g. every event/week/month while some such as governance policies may be every 6 or 12 months.

Detailed Risk Treatment Plan

For risks identified by Darts Australia within the Risk Management Action Plan that require a more detailed review to determine a satisfactory treatment plan or response plan should the risk occur, clubs are encouraged to use the following template:

Risk Category/Context:	Date:
Potential Risk:	
Level of Risk	
Responsible person(s):	
Pre-Emptive Actions: What actions are to be taken to manage the risk now it has been identified based on whether you chose to avoid, reduce, transfer or accept the risk e.g. new policy, equipment maintenance, weekly inspections, communication etc.	

Proposed Response: What action are to be taken if the risk occurs?

Resource Requirements — What resources are required to treat the risk whether through the preemptive action or response (e.g. financial, human resources, equipment etc.)

Time Frame — Outline the time frame and key dates/milestones for any pre-emptive actions or risk management

Communication

Communication is crucial effectively managing risk. A good communication plan ensures that everyone is aware of its importance, that risks are communicated to relevant members, that members are aware of key responsibilities and or relevant policies/processes and a clear process on how to report a risk is understood.

Darts Australia will take all actions necessary to ensure this risk management plank associated procedures, actions and responsibilities are implemented, monitored, communicated and undertaken by Darts Australia and its members to the best of our ability.
